

Stay safe from COVID-19

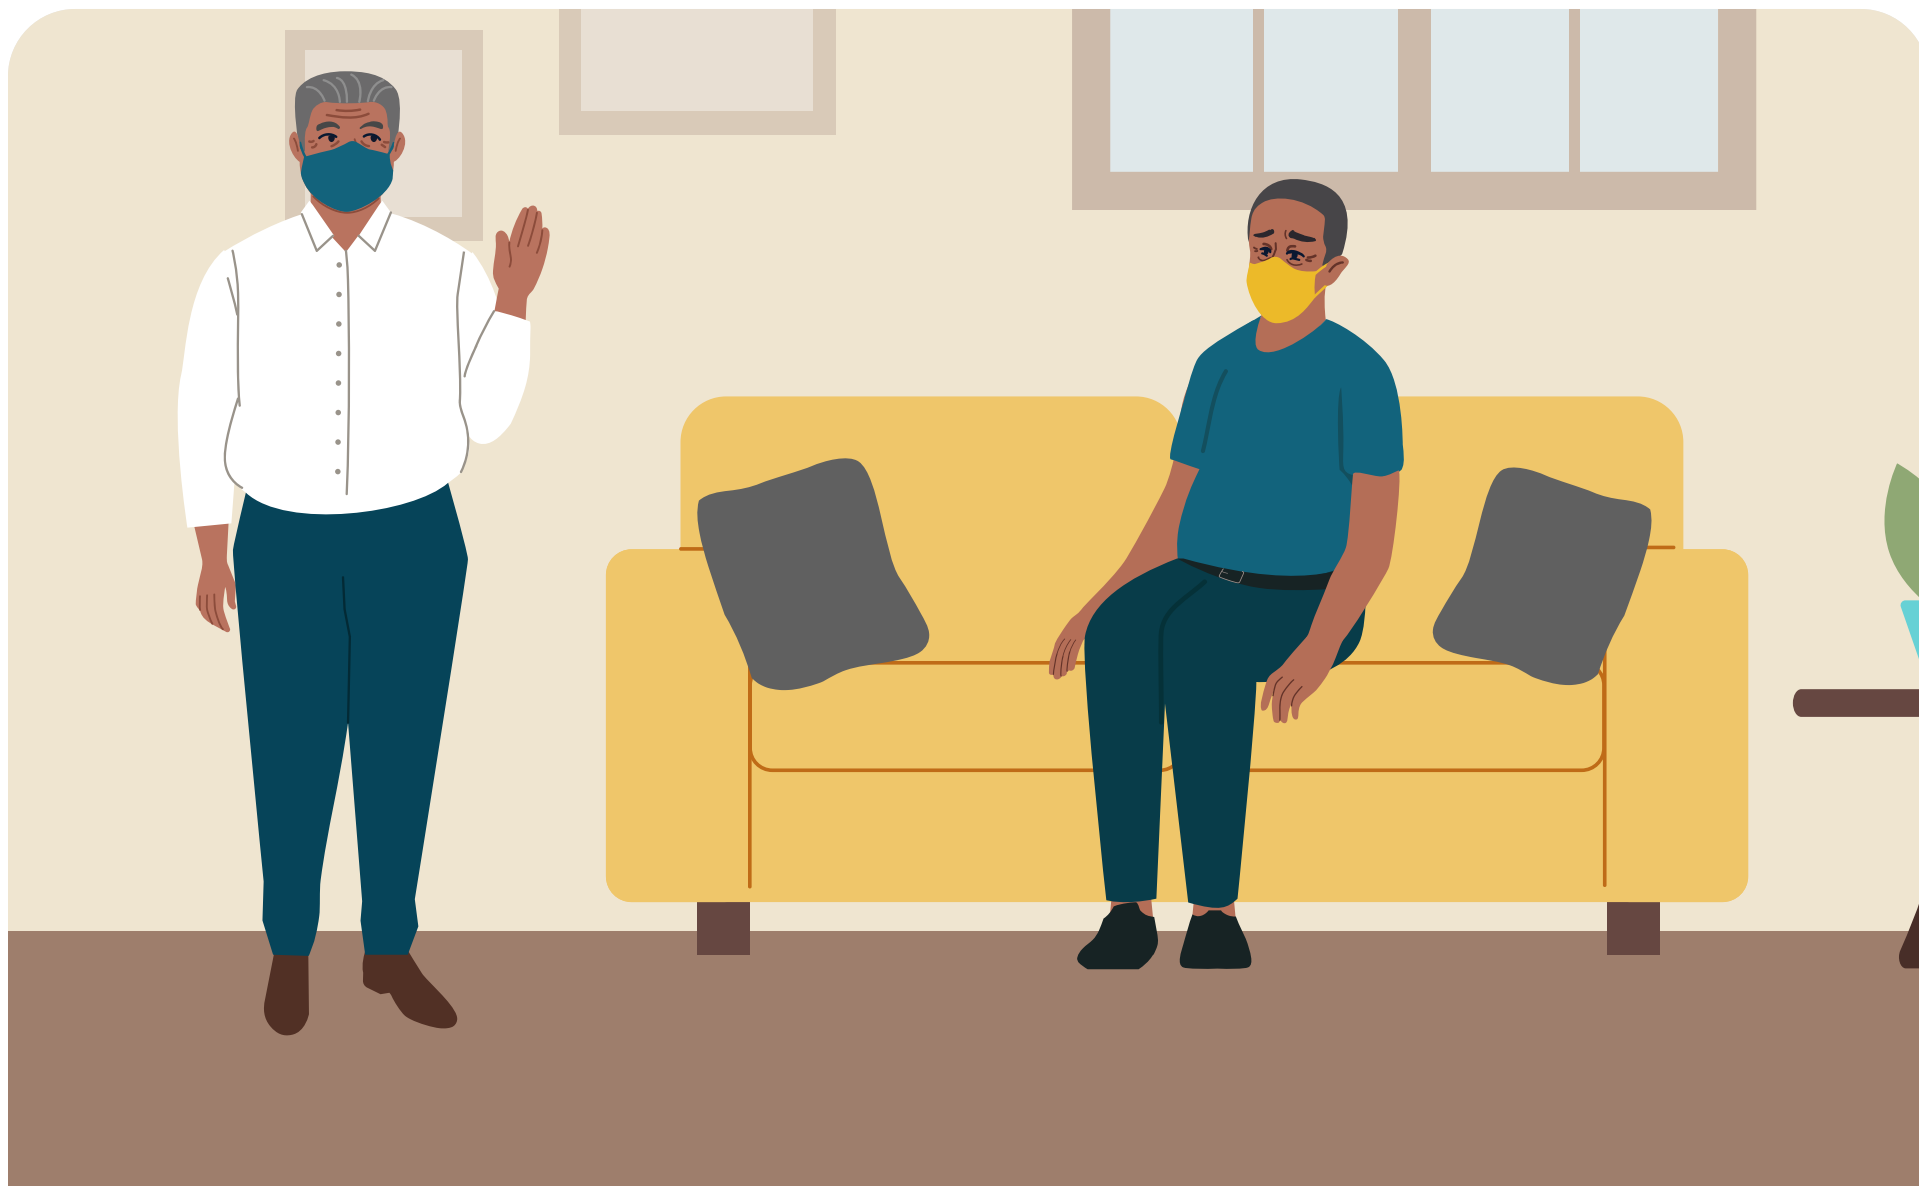

How I take a COVID-19 test at home

**I feel sick.
I cough a lot.
I am very tired.**

**I tell my dad I don't feel good.
We put our masks on so Dad won't get sick.**

**Dad says I need to take a COVID-19 test.
The test will help us find out if I have COVID-19.**

**I pick up a COVID-19 test.
I open the box.**

**I take out a cotton swab.
Now I'm ready to take the test**

I pull down my mask.
I put the cotton swab inside my nose.
I move it around in a circle.

**I don't like how it feels.
It is over soon.**

**Dad helps me finish my test.
Then I wait a few minutes.**

**We look at the test.
The test says I have COVID-19.**

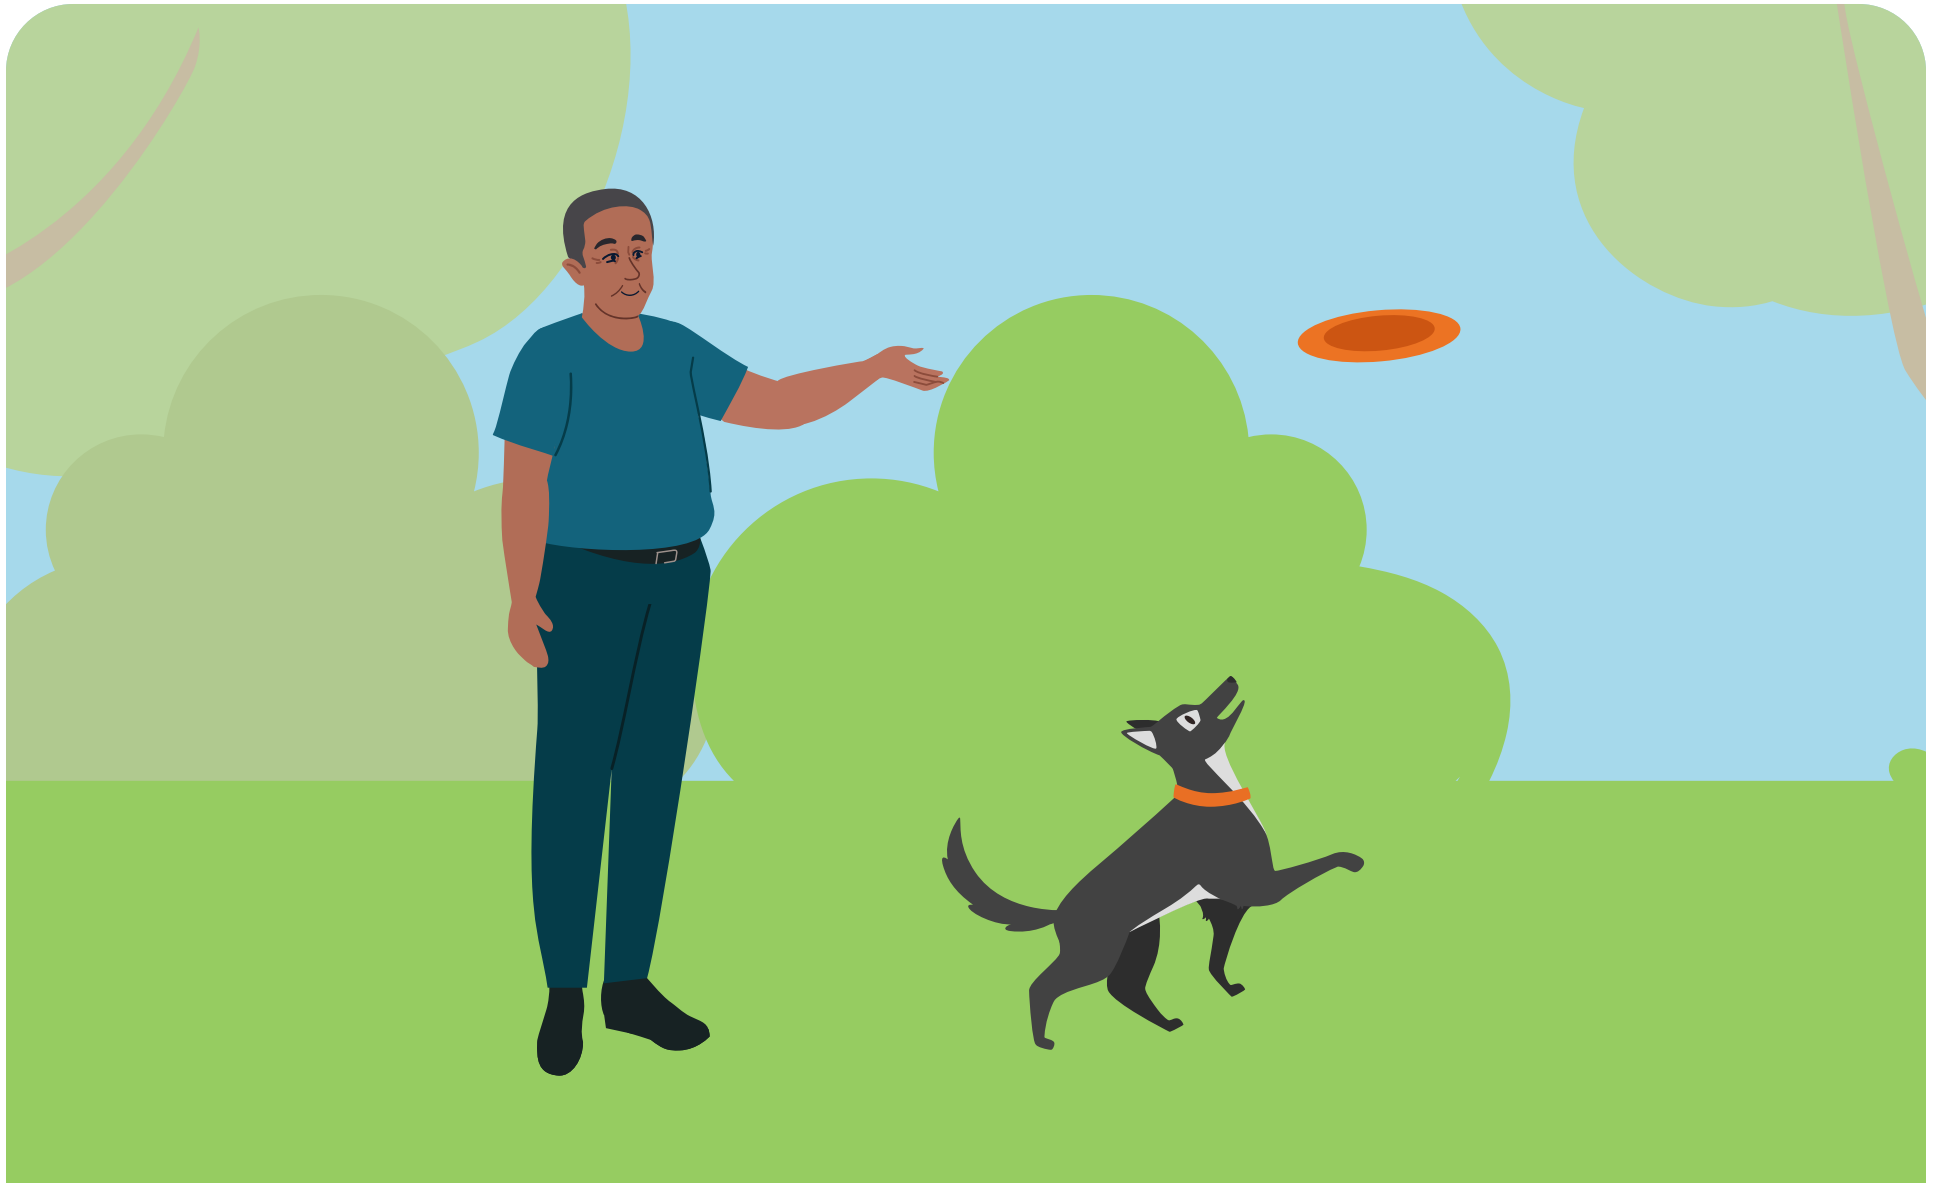

**I stay home for 5 days.
I stay in my room.**

Dad brings me lunch.

We wear our masks.

I always wear my mask when I'm with other people.

**I feel better after a few days.
I took a COVID-19 test. You can, too.**

I can protect myself and others from COVID-19.

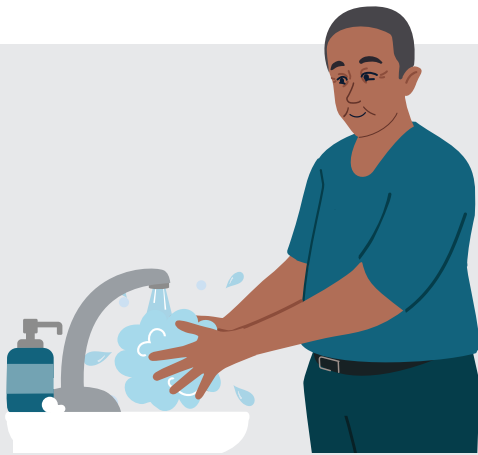

I can:

Get my COVID-19 shots

Call my doctor if I feel sick

Wash my hands with soap and water

Cover my nose and mouth when I cough or sneeze
